How to play

The diagram shows a 3x3 grid world environment. The central cell contains a robot icon (a circle with a square inside). The top-left and top-right cells are shaded gray, representing obstacles. The bottom-left and bottom-right cells are also shaded gray. The middle row and middle column are open paths. Arrows indicate the robot's possible movements: up, down, left, and right. The right side of the image shows a chat interface with the text 'chat' at the top, followed by four lines for player input: 'player 1:', 'player 2:', 'player 3:', and 'player 4:'. Below the chat input is a 'type' field with a smiley face icon and a 'send' button. At the bottom, there is a 'lobby/global' toggle switch.
